Part Number	Qty	Description
ZTCBV012	1	1/8" MIP X 1/4" FIP Leaded Brz Test Cock
TCBV012LF	1	1/8" MIP X 1/4" FIP Lead Free Test Cock
ZTCBV025	1	1/4" MIP X 1/4" FIP Leaded Brz Test Cock
TCBV025LF	1	1/4" MIP X 1/4" FIP Lead Free Test Cock

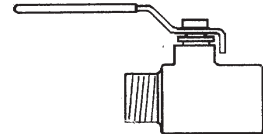

TCBV025LF

Part Number	Qty	Description
ZTCBV012SAE	1	1/8" MIP X 1/4" SAE Flare Leaded Brz Test Cock
TCBV012SAELF	1	1/8" MIP X 1/4" SAE Flare Lead Free Test Cock
ZTCBV025SAE	1	1/4" MIP X 1/4" SAE Flare Leaded Brz Test Cock
TCBV025SAELF	1	1/4" MIP X 1/4" SAE Flare Lead Free Test Cock

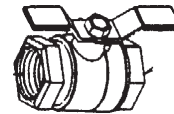

TCBV025SAELF

Part Number	Qty	Description
TCBV012LF-HDL	1	1/8" MIP X 1/4" FIP Lead Free Test Cock w/Handle
TCBV025LF-HDL	1	1/4" MIP X 1/4" FIP Lead Free Test Cock w/Handle

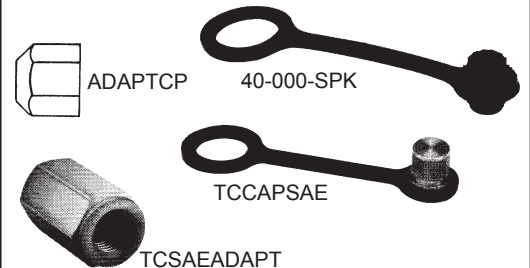

TCBV025LF-HDL

Part Number	Qty	Description
TCBV050LF	1	1/2" X 1/2" FIP Lead Free Test Cock
TCBV075LF	1	3/4" X 3/4" FIP Lead Free Test Cock

TCBV050LF

Part Number	Qty	Description
ADAPTCP	1	1/4" SAE Flare Brass Cap
40-000-SPK	100	1/4" MIP PL Plug w/Tether
TCCAPSAE	1	1/4" SAE BR Flare Cap w/Tether
TCSAEADAPT	1	1/4" FIP X 1/4" SAE Flare Adapter

Part Number	Qty	Description
Pressure Regulator	1	To assure the working water pressure does not exceed the capacity of the backflow preventer, a pressure regulator may be needed. Depending on the size, inlet pressure, and needed demand, there are several types of regulators available.

# INSTALLATION ACCESSORIES

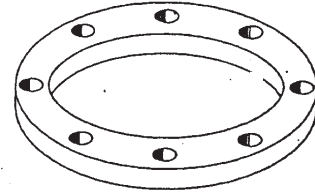

Part Number	Qty	Description	
Relief Valve	1	When pressure exceeds the systems maximum working pressure intermittently, a relief valve can be used for emergency situations. Relief valves can be activated by high pressure, high temperature or low pressure.	
Water Meter	1	To measure the amount of water used in a piping system, a water meter can register the usage in gallons or cubic feet	
PSR	1	1" Base Pipe & Valve Stand	
PSR150	1	1 1/2" Base Pipe & Valve Stand	
Enclosures	1	There are many sizes of enclosures available in many different materials including steel, stainless steel, fiberglass, aluminum and expanded metal. The materials can be painted or epoxy coated in a wide choice of colors. They are available with a heat source for freeze protection if necessary.	 <p>DECORATIVE      EXPANDED METAL</p> <p>FREEZE PROTECTION      BLANKET</p>
Air Gap Drains	1	Most manufacturers provide an air gap drain fitting to help divert the discharge from an RP to a drain receptacle. Air Gap Drains are not designed to carry the full discharge of an RP. Please provide the manufacturer, model and size of the backflow assembly so we can provide the correct air gap drain.	
Valve Setters	1	Valve Setters are a fitting arrangement designed to ease the installation of certain models of backflow prevention assemblies. This fitting arrangement can ease the piping and pipe supports needed on the jobsite for the N pattern of assemblies. Valve Setters are available in either a Flange X Flange, Flange X Mechanical Joint or a Mechanical Joint X Mechanical Joint configuration. Valve Setters are available for certain models for: Ames, Conbraco, Febco, Watts and Wilkins.	 <p>FLG X FLG</p> <p>MJXMJ</p> <p>MJXFLG</p>

Part Number	Qty	Description	
BV Handle Locks	1	Ball Valve Handle Locks are available for the different Manufacturers ball valves on backflow preventers. Locks can be used on Lever or T handles. To find the correct handle lock, supply the manufacturer, model and size of the back-flow preventer and the ball valve utilized.	
Test Cock Locks	1	Security sensitive areas may require a way of locking off unwanted use of test cocks. The TC Lock allows a keyed mechanism to be installed which will restrict use of a TC.	
Part Number	Qty	Description
